

Chia-Wei Chen

Taipei, Taiwan • (+886) 908292087 • r10323045@ntu.edu.tw

RESEARCH INTERESTS

My research interests lie in the intersection of production networks and international economics. Specifically, I am interested in how firms respond to trade policies and adjust their decisions regarding linkages, and conversely, how linkages influence the propagation of shocks. Additionally, I am interested in the econometric modeling of these models.

EDUCATION

National Taiwan University	Taipei, Taiwan
M.A., Economics	Sep 2021 – Jul 2023
Thesis: <i>Examining the Debt-Trap Diplomacy</i>	
Advisor: Tai-Kuang Ho	

National Taiwan University	Taipei, Taiwan
B.S., Physics	Sep 2016 – Jan 2020

RESEARCH EXPERIENCE

National Taiwan University	Mar 2024 – Present
<i>Full-time Research Assistant, Department of Economics</i>	
- Investigated how free trade agreements affect firm' performance in Taiwan, gaining insight of the constitutional effect on tariff reduction policies - Contributed to the network construction of a coauthored paper on indirect exporters in Taiwan utilizing granular B2B datasets - Initiate data management of 12 administrative datasets spanning 15 years, ensuring the validity and usability of the data for future research endeavors	

Academia Sinica	Oct 2023 – Mar 2024
<i>Part-time Research Assistant, Institute of Sociology</i>	
- Implemented machine learning algorithms to estimate a diffusion network, enabling insights into the technology diffusion process within US law enforcement agencies - Conducted research on developing an optimal policy for the exhibition of organized crime through the application of a game evolutionary model	

National Taiwan University	Spring 2022
<i>Part-time Research Assistant, Department of Economics</i>	
Explored the bipartite network using 5,000,000+ user-page interactions on Facebook prior to the 2016 US election	

- Generated **centrality measures** for Facebook pages within bipartite networks of interaction to capture the dynamics of their importance during various events
- Delivered compelling narratives uncovering trends in ideological affiliations through the application of **community detection on the bipartite network**

TEACHING EXPERIENCE

TungHai University

Teaching Assistant/ Instructor and Organizer for Programming

- Econometrics and Empirical Applications Fall 2022, 2023

National Taiwan University

Teaching Assistant

- Predicting Financial Crisis Spring 2023
- International Finance: The Theory, History and Econometrics Spring 2022
- Principle of Economics Spring 2022

WORKING PAPERS

1. “Caught in a Sovereign Debt Quagmire - A Quantitative Assessment,” with Tai-Kuang Ho (under review)
2. “Exporters Behind the Veil: The Role of Intermediaries in Taiwan's Production Network,” with Erin Kao and Jin-Tan Liu

CONFERENCES

30th International Conference on Computing in Economics and Finance (CEF) Aug 2024
(Paper accepted, presented by Tai-Kuang Ho)

OTHER WORKING EXPERIENCE

H2U

Intern, AI and Big-data Engineering

Taipei, Taiwan
Summer 2022

- Reduced 70% work by developing a natural language processing pipeline and infrastructure for the team
- Created topic categorization for media contents with BERT, with 88% accuracy compared to manual classifications

SKILLS

Programming Skills – Stata, Python, MATLAB, R

Language – Chinese (Native), English (TOEFL iBT 109), Japanese (N3)
